A Fall of Moondust was Sir Arthur's eighth published novel. It's publication in 1961 was preceded by his futuristic underwater adventure The Deep Range in 1957. This period of four years had not been idle, though. Arthur had been writing short stories and moved from the UK to Ceylon (now Sri Lanka) and helped set up a diving business.

A Fall of Moondust Quotes Showing 1-14 of 14 "Tom hated to admit defeat, even in matters far less important than this. He believed that all problems could be solved if they were tackled in the right way, with the right equipment. This was a challenge to his scientific ingenuity; the fact that there were many lives involved was immaterial.

A story of the future, about a specially designed air vessel that sinks with its human cargo into a sea of dust in one of the craters of the moon.

During the twenty-second century, a space probe's investigation of a mysterious, cylindrical asteroid brings man into contact with an extra-galactic civilization

A "superbly ingenious" classic of space survival from the author of 2001: A Space Odyssey—one of science fiction's most influential grandmasters (Daily Express). Expanding the Moon's population hinges on building a thriving tourist industry. But when a prototype tourist craft called the Selene encounters a moonquake, the ship plummets under a vast body of liquid-fine moondust called the Sea of Thirst. While time runs out for the passengers and crew, rescuers find their resources stretched to the limit by the unpredictable conditions of the lunar environment. Nominated for the Hugo Award in 1963, this brilliantly imagined story of human ingenuity and survival is a tour-de-force of psychological suspense and sustained dramatic tension sure to appeal to fans of Andy Weir's The Martian. "The best book yet about man's most dramatic journey, the most exciting science fiction novel for years." "Evening Standard" "Expertly told and cruelly exciting to the end." "The Sunday Times" "Extremely good . . . with some superbly ingenious and exciting new twists." "Daily Express

Political and environmental disasters come crashing down in this earthquake sci-fi thriller co-written by the authors of 2001: A Space Odyssey and Memories. When he was seven years old, Lewis Crane survived the Los Angeles earthquake of 1994—but his parents did not. Haunted by the tragedy, Crane has dedicated his life to protecting humanity from similar disasters. Now he is a Nobel Prize-winning earthquake scientist who perfected equipment sensitive enough to predict an earthquake strike down to the minute. And he wants to go further. Crane has formed an organization to explore the idea of stopping earthquakes entirely by fusing the Earth's tectonic plates together. But what effect will this have on the earth? And as political unrest causes tremors of another kind, can Crane's audacious plan stop another major earthquake due to hit the United States? Co-written by Hugo and Nebula Award-winning author Arthur C. Clarke and Philip K. Dick Award-winning author Mike McQuay, the "two formidable SF talents converge splendidly in this disaster thriller, which offers sleek action-adventure writing, world-class tumult and a coherent near-future based on sound yet innovative social and scientific speculation" (Publishers Weekly).

Short stories from the science fiction master—including the tale that inspired 2001: A Space Odyssey. These stories present a brilliant showcase of Arthur C. Clarke's many-layered approach to the moral dilemmas of scientific advancement—from the thrilling and brutal "Breaking Strain" to the more poetic and thoughtful "Second Dawn." Also included is "The Sentinel"—the basis for the classic Stanley Kubrick film 2001: A Space Odyssey. This outstanding collection reminds us that the author of Childhood's End was not only a giant in the world of science fiction, a recipient of multiple Nebula and Hugo Awards, and an incomparable storyteller, but also a "skilled literary artist" (Hartford Courant). "I do not know of any short story that has moved me more than Arthur C. Clarke's "If I Forget Thee, Oh Earth." "The Christian Science Monitor

This "marvelous lunar espionage thriller" by the science fiction grandmaster and author of 2001: A Space Odyssey "packs plenty of punch" (SFReviews.net). Two hundred years after landing on the Moon, mankind has moved further out into the solar system. With permanent

settlements now established on the Moon, Venus, and Mars, the inhabitants of these colonies have formed a political alliance called the Federation. On the Moon, a government agent from Earth is tracking a suspected spy at a prominent observatory. His mission is complicated by the rise in tensions between Earth's government and the Federation over access to rare heavy metals. As the agent finds himself locked in a battle for life and death on the eerie, lunar landscape, the larger conflict explodes across space, leaving mankind's future in doubt. First published in 1955, this suspense-filled space opera by the Science Fiction and Fantasy Hall of Fame inductee was a significant forerunner of television hits like Star Trek and The Expanse.

A forth collection of gripping short stories from the most acclaimed Science Fiction author of any generation. Arthur C Clarke is without question the world's best-known and most celebrated science fiction writer. His career, spanning more than sixty years, is one of unequalled success. Clarke has always been celebrated for his clear prophetic vision, which is fully on display in this audiobook, but there are also many stories which show his imagination in full flight, to the distant future and to far-flung star systems. This forth volume in a series of five includes some of Clarke's most accomplished work, including Sleeping Beauty, The Man who Ploughed the Sea and Cosmic Casanova. This volume is of special interest -- included are a wide range of classic stories, including the title story, "Jupiter Five," "The Deep Range," "Second Dawn," and the earliest of the splendidly comic narratives told by Harry Purvis for the benefit of the denizens of the White Hart.

Since the beginning of time it had worked its will on humanity, and for as long as man could remember, he had struggled against its power. But in the 21st century the battle was won: the sea, mankind's age-old enemy, had finally been conquered. Professionals like Walter Franklin now patrolled the infinite savannahs of the oceans, harvesting from the plankton prairies as crop which kept the world fed. But like that other great frontier, space, the sea had not yet yielded up all its secrets. And men like Franklin would never rest until its every fathomless mystery had been challenged . . .
