Chemactivity 8

Nuclear chemistry is the study of the breakup of unstable nuclei, which results in the emission of radiation and energy. There are three types of radiation; alpha (α), beta (β) and gamma (γ).

Chemactivity 8

Nuclear and ionizing radiation

A nuclear reaction is a change in the composition of the nucleus of an atom. This is not normally considered a chemical reaction, and does not depend on what molecule the atom might be in. There are three types of nuclear reactions: fusion, fission, and
