All over the tri-state area, something strange is happening. Teenagers who die aren't staying dead. They are coming back to life, but they come back different - they stutter and their reactions to everything are slower. Termed 'living impaired' or 'differently biotic', there are lots of conspiracy theories to explain this new phenomenon. But as their numbers keep on growing, so does the discomfort of the living people in the community. When Phoebe falls for Tommy Williams, her best friend and star of the football team, Adam, has conflicting emotions. And when Tommy decides to try out for the football team, it sets off a chain of events that escalates into deadly violence.

In the altered realms of Battleworld, Angela and Sera are Witch Hunters, the scourges of King James' England, 1602. In a land beset by magic and monstrosity, they seek a new and seductive evil- not witchbreed, but deal-making Faustians, who bargain with ancient creatures for unnatural power! Moral ambiguity? Fancy allusions? Marguerite making the most of that English degree? Collecting: 1602 Witch Hunter Angela #1-4, 1602 #1.

Frustrated because of a constantly closed door in her house, Angela eventually opened it and the heart-wrenching discovery left her speechless. The detectives assigned to the case dug deep into it, and their investigation led to something bigger.

'Lone Hunter' is volume 1 of the Moses Hoffman Trilogy, novels based on the unusual life of a Berlin printer known as Mo, who has become an international criminal stealing books and manuscripts. Gradually the transition from traditional media to the networked digital environment raises enormous issues of authenticity, identity and integrity in volume 2, 'Animal Self' about events in Venice surrounding a set of images Mo intuits, culminating by volume 3, 'The Swoop' in a complex framework of virtual and material realities under investigation by 'reconstructionist historians' at work long into the future. "...an astonishing piece of prose..." Eve Lucas, ex-berliner magazine.

Now with SAGE Publications, Cheryl Cisero Durwin and Marla Reese-Weber's EdPsych Modules uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct, stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies—early childhood, elementary, middle school, and secondary—and ends with "Assess" and "Reflect and Evaluate" questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text.
