

Dc Machine Objective Questions Answers

Recognizing the pretentiousness ways to get this books **dc machine objective questions answers** is additionally useful. You have remained in right site to start getting this info. get the dc machine objective questions answers associate that we offer here and check out the link.

You could purchase lead dc machine objective questions answers or get it as soon as feasible. You could quickly download this dc machine objective questions answers after getting deal. So, afterward you require the book swiftly, you can straight acquire it. It's thus unquestionably easy and for that reason fats, isn't it? You have to favor to in this reveal

Answer 4. Less than 50% . Explanation: Why efficiency of D.C motor is below 50%. The DC

motor develops maximum power when the Back EMF is half the applied voltage is $E_b = V / 2$.

Practically it is not possible to develop an exact 50% of maximum power because in that case,

the current would be much beyond the rated current of the motor.

Answer 1. To restrict armature current as there is no back E.M.F at starting . Explanation: At the time of starting a DC Motor, the Back EMF developed is zero as its speed is zero. We know that general emf equation $E = E_b + I_a R_a$. At starting $E_b = 0$ so $I_a = E/R_a$
