Effect Of Sintering

Download File PDF Effect Of Sintering Temperature And Time On Preparation

At the sintering temperature of 1170 °C, the hardness decreased to 42 HRC, a drop of 17% compared to the alloys sintered at 1140 °C. At this sintering temperature, the average size of the grains in the alloys

Download File PDF Effect Of Sintering Temperature

significantly increased, and the amount of carbides and borides in the alloys substantially reduced.

Effect of sintering temperature and heat treatment on ...

For the temperature range of

Download File PDF Effect Of Sintering Temperature

1000 °C–1200 °C, the grain boundaries can be reduced with higher sintering temperature and the spins would be aligned under a magnetic field. Both of them can relieve the strong scattering effect at grain boundaries and unparallel spins.
