for many

As such, this

represents an

BIOLOGY 2 The  
cell and its  
requirements The  
world of living  
things is

conveniently and  
conventionally  
divided into two  
great groups,  
the animals and  
the plants.

Broadly speaking  
the important  
feature which

# Download Free Essential

distinguishes  
plants is that  
they can  
manufacture most  
of the  
substances they  
require by  
trapping and  
using various  
forms of outside  
energy, in  
particular the  
energy of  
sunlight. In the

# Download Free Essential

process of photosynthesis they utilize the energy of light to build up complex chemical substances from relatively simple ones. In contrast, animals lack the ability to use light or any other form of

# Download Free Essential

outside energy.  
Instead they  
must obtain the  
energy they  
require by  
breaking down  
complex  
substances which  
ultimately they  
always obtain  
from plants.  
Plant-eating  
animals such as  
cows and sheep

# Download Free Essential

obtain these  
substances  
directly.

Carnivores

obtain them  
indirectly after  
they have passed  
through the  
bodies of other  
animals.
