The Financial Risk Management Exam (FRM Exam) is a test given annually in November to risk professionals who want to earn FRM® certification. The Global Association of Risk Professionals has developed the exam and supports exam instruction by publishing the Financial Risk Manager Handbook, authored by Philippe Jorion. Every year, GARP organizes the exam and the FRM® Certificate Program, whose goal is to establish an industry standard of minimum professional competence in the field. The examination is fast becoming an essential requirement for risk managers all over the world. The goal is to make The FRM Handbook the definitive instructor's guide for the exam and learning guide among in-house training programs and university courses focused on financial risk management.

GARP's Foundations of Banking Risk and Regulation introduces risk professionals to the advanced components and terminology in banking risk and regulation globally. It helps them develop an understanding of the methods for the measurement and management of credit risk and operational risk, and the regulation of minimum capital requirements. It educates them about banking regulation and disclosure of market information. The book is GARP's required text used by risk professionals looking to obtain their International Certification in Banking Risk and Regulation.

Explores practical advantages of Grid Computing and what is needed by an organization to migrate to this new computing paradigm This self-contained reference makes both the concepts and applications of grid computing clear and understandable to even non-technical managers Explains the underlying networking mechanism and answers such questions critical to the business enterprise as "What is grid computing?" "How widespread is its present/potential penetration?" "Is it ready for prime time?" "Are there firm standards?" "Is it secure?" "How do we bill this new product?" and "How can we deploy it (at a macro level)?"
