Fully revised and updated content matching new Cambridge International Examinations 9701 syllabus for first examination in 2016. Endorsed by Cambridge International Examinations, this digital edition comprehensively covers all the knowledge and skills students need during the A Level Chemistry course (9701), for first examination in 2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.

The Big Fat Notebooks go to high school! A lively, fully illustrated guide to acing high school chemistry, with clear notes on the big ideas, helpful tips for memorizing processes and remembering definitions, and lively doodles that make science easier to understand (and fun to study).

Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe.

Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive--and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills--and a relentless, dogged refusal to quit--he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

Complete Chemistry is a revised and enlarged edition of the popular GCSE Chemistry improved to bring it totally up-to-date. This book covers all syllabuses with core material, for Double Award, and extension material, for Science: Chemistry. The breadth and depth is sufficient to stretch your students aiming for the top grades and makes it an excellent foundation for those intending to progress to advanced level chemistry. Key Points: · Now includes all the necessary topics for IGCSE · Concepts and principles of chemistry presented in a clear, straightforward style · Lively and colourful coverage of the relevance of chemistry in the real world · End of chapter testing with more challenging and structured questions · Examination style questions · Pagination remains the same as GCSE Chemistry so that the two can be used alongside each other

The Big Fat Notebooks are going to high school! Published just four years ago, the Big Fat Notebooks—with nearly 4.6 million copies in print and sales escalating every year—revolutionized the study guide for middle schoolers. Now this lifesaving series is ready to graduate. Announcing the first two titles for high school students: Everything You Need to Ace Geometry in One Big Fat Notebook and Everything You Need to Ace Chemistry in One Big Fat Notebook. Designed as the natural next step for the savvy students (and stressed parents) who made Math (over 1 million copies in print) and Science (over 1 million copies in print) the bestselling titles in the middle school series, these books offer a world of help for two of the tougher classes facing most high school sophomores, geometry and chemistry. Using the same formula that made the middle school series so successful, these new high school titles tackle difficult subjects in a lively, memorable, intuitive way. Critical ideas are broken down and clearly explained. Doodles illuminate tricky concepts. There are mnemonics for memorable shortcuts, and quizzes to recap it all. Geometry, written by high school math teacher extraordinaire Christy Needham, follows along with a year of geometry class, starting with the basics, like points, lines, planes, and angles, and progressing to the beginning of trigonometry. Big Fat Notebooks are already helping millions of middle school students. Now high schoolers will enjoy and benefit from this kind of brilliant help—a set of notes, as if from the smartest kid in class, to help them study throughout the year, get ready for challenging exams, and know they have a source to turn to when they need to catch up on missed problems or understand the most difficult or confusing concepts.

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This second edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum topics specified in the Cambridge IGCSE Biology syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

This fresh set of resources for Cambridge IGCSE Sociology syllabus 0495 (and Cambridge O Level Sociology syllabus 2251) is carefully crafted to match and support the revised syllabus for first examination in 2016. Written in clear and accessible language, the Coursebook provides comprehensive coverage of the syllabus in a visually-stimulating format. Key sociological research combined with case studies and thought provoking questions help in understanding concepts. Features such as Key terms and Revision checklists further reinforce learning and understanding of core subject areas. Engaging activities help in applying knowledge in various contexts and building interpretation, analytical and evaluation skills. The book provides complete exam support with each chapter culminating in exam-style questions and a further chapter dedicated to revision, and examination skills and practice. A Teachers CD-ROM is also available.

This revised set of resources for Cambridge IGCSE, IGCSE (9-1) and O Level Business Studies syllabuses (0450, 0986, 7115) is thoroughly updated for first examinations from 2020. This coursebook contains exam-style case studies and stimulus material from businesses around the world - ranging from a social enterprise in China to a fast food outlet in Zimbabwe. These give an international view of the real world applications of Business Studies theory. This book provides comprehensive exam support with questions to help students practise and build their confidence with the subject. The final chapter gives revision tips and advice on writing well-structured answers. The answers to the coursebook questions are in the teacher's resource. For free revision support, go to the Cambridge University Press website.

The Periodic Table Book is the perfect visual guide to the chemical elements that make up our world. This eye-catching encyclopedia takes children on a visual tour of the 118 chemical elements of the periodic table, from argon to zinc. It explores the naturally occurring elements, as well as the man-made ones, and explains their properties and atomic structures. Using more than 1,000 full-colour photographs, The Periodic Table Book shows the many natural forms of each element, as well as a wide range of both everyday and unexpected objects in which it is found, making each element relevant for the child's world.
