Manual is one of the two Drifting modes you can choose from in Mario Kart Wii. With this setting, players now have Drift on their own instead of power-sliding Automaticly. However, although it takes more work to perform a drift in the race, the player is rewarded with Mini-Turbos for executing a well rounded drift.

Powersliding in Mario Kart DS beta. Drifting, known as Powersliding before Mario Kart Wii, is an ability in all the Mario Kart games that allows the player to slide around a corner without losing any speed that would occur had the player simply turned. In Super Mario Kart, drifting is essential, lest the kart spin out.

Manual mode is similar to driving in previous Mario Kart games. When going around a turn, you can hop and drift to modify the turn. If your drift stays at a sharp enough angle for long enough, the sparks flying out the back of your vehicle will change color. When the color changes, you can release the drift button to get a speed boost.
