frogs, are now more common in garden ponds than in the countryside. You can build a pond at any time during the year, but if you start in autumn or late winter, it will get established much quicker.

How to build a pond | The Wildlife Trusts

The best ponds for wildlife have shallow margins with a fringe of vegetation and nearby plant cover for amphibians and insects with terrestrial life stages. Why is it like this? Many ponds are artificial and were originally dug for marl (a lime-rich clay spread on fields to reduce acidity) or to provide a water source for livestock.

Ponds | The Wildlife Trusts

Though not much more detailed than other books on the actual construction of the pond, this book is hugely useful in the stocking of the pond so as to attract the wildlife we seek - notably frogs, toads and newts. And there is detail the likes of which few other books provide, and certainly not so comprehensively.
